 <https://josesalasdev.github.io>

Summary

From the backend I develop infrastructure and services with python (*.py) & go lang (*.go), I have had the opportunity to work in many industries and in each development team I leave my mark and nice friends. I also love learning and teaching.

Experience

Software Engineer

Mercado Libre

Jan 2021 - Present (1 year 7 months +)

INTERNET | [mercadolibre.com](https://www.mercadolibre.com) | Machine Learning

Responsibilities:

- Build, monitor, maintain, scale, and deploy microservices. Be vigilant against any eventuality that occurs in the applications 24/7.
- Build and maintain tools to automate jobs, labs, ETLs and development processes.
- Help automate processes that help the work cycle of data science, machine learning among other data profiles.
- Teach and help other profiles about good practices, internal processes and new technologies.

Technologies: Python, go lang, API rest, Jobs, ETLs, GCP, docker, Flask, docker, Django, fastapi, Mysql, DynamoDB, CI-CD, kibana, datadog, AWS, GIN.

Backend Developer

Zinobe

Feb 2020 - Jan 2021 (1 year)

FINTECH | [zinobe.com](https://www.zinobe.com) | [lineru.com](https://www.lineru.com) | [aliatu.com](https://www.aliatu.com) | Python

Responsibilities:

- Build, maintain microservices core. Build APIs rest and graphQL.
- Create PIP package to be used by other projects.
- Collaborate with other teams for example: frontend & QA.

Technologies: Python, pandas, API rest, graphQL, docker, mongoDB, Flask, PHP, CI.

Backend Developer

Quick

Feb 2019 - Feb 2020 (1 year 1 month)

LOGISTICS | [quick.com.co](https://www.quick.com.co) | Python

Responsibilities:

- Build, monitor, maintain microservices core. Leading the new version of a core product.
- Collaborate with other teams: frontend, mobil & QA.
- Automating reports PDFs.

Technologies: Python, PHP, Django, Lumen, Postgres.

Backend Developer

Total Marcas SAS

Aug 2017 - Feb 2019 (1 year 7 months)

E-COMMERCE | totalmarcas.com | Python
